MADE IN JAPAN

FUDO HOOKS

JAPANESE TECHNOLOGICAL PERFECTION

FUDO HOOKS are the perfect quality hooks made in Japan with optimum composing of the best materials, the best technology and the highest human skills. The main characteristics of FUDO HOOKS are : 1. Optimal shape - from a view point of the highest catch ability 2. Extreme sharpness, which is kept when fishing 3. Great elasticity that allows them to resist deformation. 4. Total corrosion resistance production process takes an advantage of several patents in field of metallurgy and production technique. Special selected material - carbon steel of controlled carbon content - is used in FUDO HOOKS production. That material, in form of calibrated wires, is prepared for FUDO engineering exclusively. There are two different sharpening methods used : mechanical and chemical. During sharpening, the level of sharpness is controlled on-line what finally brings an ideal repeatability of hook point. Hardening is realized in insulated ovens where the system of computer assistance controlling the temperature with accuracy of 0.01 degree of centigrade, and the time of treating is adjusted with accuracy of 0.001 second. In result, FUDO HOOKS are perfectly hardened and achieve excellent power and elasticity. All models of FUDO HOOKS have “ Built-In ” corrosion resistance.

FUDO DELTA FAMILY

Modern hooks with especially designed, completely new, shape of point. Special gouge at the flat keeps fishing line in right space. Profile of new point has triangle shape with edges and elongated point so now it looks like ending of harpoon tooth.

TRUST GRIP

Accurate and fine laser carving on the end to prevent from the line come-off, trust cutting to restrain the line-moving, you can devote to your great fishing without any worry of knot between hooks and lines.

TRIPLE EDGE POINT

We adopted our new technical process named “ Triple Edge Point ” on all FUDO DELTA HOOK series. Cutting the needle point by three different degree, equipped with anti-corrosion and anti-bending in high level, it will show the excellent hook stick.

MADE IN JAPAN

All designs, specification and price are subject to be changed without notice.

Due to the printing condition, actual hook size may be slightly different from the ones shown in the catalogue.

- Hook point is very sharp, please handle with care
- Do not use except fishing
- Keep out of the hand of children
